Index of Abstracts

Volume 9 (1988)

Aavatsmark, Ivar. *Capillary energy and entropy condition for the Buckley-Leverett equation*, 476.

Abadi, Martin, Feigenbaum, Joan and **Kilian, Joe.** *Encrypted oracle queries*, 125.

Abbed, Eyad H. See **Liaw, Der-Cherng.**

Abbott, Catherine. *Weakly precompact operators on continuous function spaces* (Preliminary report), 88.

Abdelkader, Mostafa A. *Exact chaotic solutions of a second-order quadratic system*, 220. *Exact solution of a moving boundary layer equation for waves*, 270. *Exact solutions of predator-prey equations with cover for the prey*, 339. *Exact traveling wave solution of a two-phase flow equation*, 428. *Exact solutions for a 2nd-order equation cubic in the 2nd derivative*, 506.

Abels, Herbert. *Finiteness properties of certain arithmetic groups over functions fields* (Preliminary report), 245.

Abhyankar, Shreeram S. and **Heinzer, William J.** *Integral closure and ramification of prime ideals in infinite algebraic field extensions* (Preliminary report), 177. *Normal surfaces with infinitely many singularities* (Preliminary report), 352.

Abhyankar, Shreeram, Trafalis, Theodore and **Morin, Thomas L.** *Maximal facets of a polytope: parametrization of hyperellipsoids and their application in multiple objective optimization*, 459.

Abian, Alexander. *An equivalent of the axiom of choice in finite models for the powerset axiom*, 267. *Some properties of finite models for the powerset axiom*, 324. *A partial order generalization of Alexander's subbase theorem*, 415. *A simpler number-theoretic formulation of Picard's theorems*, 506.

Abian, Alexander and **Bernau, S. J.** *The elementary divisors of matrices AB and BA*, 34.

Abian, Alexander and **Kemp, Paula A.** *A nonassociative powerassociative algebra of infinite matrices*, 293.

Abian, Alexander and **Martin, Andrew D.** *Pseudo-inductive subsets of partially ordred sets*, 213.

Abian, Alexander. See **Martin, Andrew D.**

Abian, Alexander and **Wilson, James A.** *A theorem equivalent to the fundamental theorem of algebra*, 421.

Abotteen, Essam. *Power operations in the representation ring of the wreath product* (Preliminary report), 160. *Outer plethysms in the representation theory of the general linear groups over F_q* (Preliminary report), 179. *A structure theory for the Hopf representation ring of the wreath product $[G]S_n$* (Preliminary report), 357.

Abramovich, Y. A., Lipecki, Z. and **Rotkovich, G. Y.** *One-codimentional dense sublattices of Banach lattices*, 334.

Abu-Kaff, T. M. and **Dahiya, R. S.** *Oscillations of solutions of arbitrary order functional differential equaitons*, 220.

Acker, Andrew F. *On the convexity and nonconvexity of solutions in a free-boundary problem in fluid dynamics*, 367.

Acker, Andrew. See **Lancaster, Kirk E.**

Adams, Colin and **Sherman, William.** *Minimum ideal triangulations of hyperbolic 3-manifolds*, 379.

Adeleke, Samson A. See **Holland, W. Charles.**

Adleman, Leonard M. and **Huang, Ming-Deh A.** *Recognizing primes in random polynomial time* (Preliminary report), 464.

Adler, Ilan and **Monteiro, Renato D. C.** *Limiting behaviour of the affine scaling continuous trajectories for linear programming problems*, 458.

Adler, Ilan. See **Menteiro, Renato D. C.**

Agarwal, A. K. *On a Rogers-Ramanujan type identity with a convolution property* (Preliminary report), 30.

Agarwal, Manju. See **Shukla, J. B.**

Ahlbrandt, Gisela. *Examples of totally categorical theories*, 237.

Ahmadi, Mohammad H. *On Diophantine equations arising from Egyptian fractions* (Preliminary report), 30.

Ahuja, Mangho. *A geometric measure of the non-rectangularity of a hyperbola*, 306.

Ahuja, O. P. and **Silverman, H.** *Function classes related to Ruscheweyh derivatives*, 296.

Akama, Takehiro. See **Suzuki, Hitoshi.**

Akin, Kaan. *Resolutions of the Poincaré modules of the Plucker coordinate ring of the Grassmannian*, 164.

Aktosun, Tuncay. *Direct and inverse scattering for nonlocal potentials in one dimension*, 171. *Inverse scattering for potentials with local and nonlocal components*, 261.

Alas, O. T. *On the number of open sets* (Preliminary report), 146. *Cardinal inequalities using tightness* (Preliminary report), 425.

Alas, O. T. and **Weiss, M. A.** *Cardinal inequalities in semitopological groups* (Preliminary report), 510.

Albrecht, Ulrich. *Categorical properties of A-solvable Abelian groups*, 45.

Albree, Joe. *A system more suitable to our meridian: Nicolas Pike's "Arithmetic", the bicentennial*, 283.

Alemzadeh, Abolghassem. *Convergence of reduced gradient method*, 305.

Alexander, Ralph. *A new method in the study of irregularities of distribution* (Preliminary report), 335.

Alford, W. R. *Factoring large numbers on a "Shoestring"*, 464.

Ali, Sayel A. *Upper bound for the degree of an approximating monomial*, 264.

Ali, Ziad R. *Subordinating factors of a Norlund transformation* (Preliminary report), 219. *Subordinating factors of a progressive transformation* (Preliminary report), 269.

Alikakos, Nicholas D. *Blow up for the diffusion-advection equation*, 400.

Alikhani-Koopaei, Aliasghar. *Borel measurability of extreme local derivatives*, 54.

Al-Khafaji, M. *Homogeneity of distributions on local fields* (Preliminary report), 91.

Allen, G. Don, Ward, Joseph D. and **Andrews, Kevin T.** *A note on similarity and isometric equivalence of L_p-nests*, 335.

Allender, Eric and **Watanabe, Osamu.** *Kolmogorov complexity and degrees of Tally sets* (Preliminary report), 124.

Allouche, Jean-Paul. *Finite automata and p-adic integers*, 468.
